THE PREPARED CHURCH

MASTER COLLECTION | 24-WEEK CURRICULUM | VERSION 1.0

Equip the Church • Strengthen Families • Serve Communities • Multiply the Mission

A free Christian preparedness education initiative

This collection consolidates 12 drafted modules, 12 instructor handbooks, 12 family workbooks and 12 video research documents (36 core PDFs). It includes additional Module 1 video-audit material and an optional classroom teaching edition.

Biblical foundation: Proverbs 22:3 (KJV). Preparedness is presented as stewardship and neighborly service, not a reason for fear.

Publication status: Pilot drafts only. The instructional PDFs, linked media, safety procedures, legal considerations and instructional competence need appropriate review before public release.

Production date: 12 November 2026

01 | The 24-week curriculum

Module	Weeks	Subject
1	1–2	Emergency Preparedness
2	3–4	Emergency Water Security
3	5–6	Fire Safety & Emergency Cooking
4	7–8	Emergency Food Storage
5	9–10	Food Preservation & Safe Canning
6	11–12	Emergency Medicine & First Aid
7	13–14	Emergency Shelter, Sanitation & Hygiene
8	15–16	Gardening & Food Production
9	17–18	Emergency Power & Off-Grid Living
10	19–20	Wilderness Preparedness & Survival Skills
11	21–22	Community Food Security & Self-Sufficiency
12	23–24	Church Emergency Response & Community Resilience

02 | How each church runs the course

• Two 60-minute lessons per module; one module every two weeks.

• Teach from the instructor handbook; distribute the matching family workbook.

• Use printed materials or offline alternatives if an online video is unavailable.

• Demonstrate only techniques the instructor can safely supervise.

• Complete a practical family assignment and a knowledge check.

• Invite the wider community to a free learning event; service is not conditional on religious participation.

03 | Standard class outline

0–5 min: Scripture and lesson purpose

5–15 min: Learning objectives and context

15–25 min: Reviewed instructional resources or live explanation

25–45 min: Safe, supervised practical exercise

45–55 min: Reflection, assessment and discussion

55–60 min: Family assignment and next steps

04 | Video-library governance

All 12 registers are research documents, not approved classroom playlists. A reference to a video, creator, or publisher is not a claim that the footage has been watched in full or that it is safe to replicate.

• Record title, creator, source, direct link, publication date (if available), exact runtime, and the date the video was checked.

• Watch the complete video and review hazards, claims, age suitability, current professional guidance, and whether the technique can be demonstrated safely.

• Specify exact start/end times only after verifying them in playback.

• Mark each entry Approved, Approved with Conditions, Reference Only, Rejected, or Pending Review.

• Link to or lawfully embed video. Obtain permission before copying, editing, or redistributing third-party footage.

• Re-review safety-sensitive lessons periodically and when guidance changes.

05 | Required safety reviews

• Medical training: CPR/AED and bleeding control require recognized practical instruction for skills validation; awareness materials are not certification.

• Food preservation: teach tested USDA/NCHFP recipes and use qualified oversight for high-risk canning.

• Water: treatment does not remove all chemical hazards; obey local drinking-water advisories.

• Fire and emergency power: enforce burn bans, outdoor generator placement, carbon monoxide precautions and electrical safety.

• Shelter and sanitation: assess site suitability, public-health obligations, accessibility, occupancy and waste disposal.

• Gardening and food sharing: review soil contamination and food-handling requirements.

• Wilderness: emphasize rescue, trip planning, supervision and avoidance of hazardous social-media stunts.

• Church disaster operations: coordinate with local emergency management; education does not authorize shelter or professional response operations.

06 | Pilot governance and privacy

• Appoint a church coordinator and a named safety officer with stop-work authority.

• Use consent-based family support records; collect only data needed and limit access.

• Provide child safeguarding, volunteer screening, accessible participation and incident reporting.

• Confirm venue permission, zoning, fire rules, insurance and relevant food/waste handling procedures.

• Record instructors' qualifications for specialized demonstrations and partner with local CERT, extension and public-health educators.

07 | Recommended 90-day pilot

• Days 1–30: inventory materials, review safety, complete an initial video-approved set and recruit qualified reviewers.

• Days 31–60: run a small 2-week introductory class at each pilot church, collect observations and revise unclear materials.

• Days 61–90: deliver a free neighborhood workshop, repeat a safe table-top response exercise, and publish an evaluation report.

08 | Quality gate before public launch

• Subject-matter experts have signed off on safety-critical lessons.

• Every video actually used in class has a complete viewing review and copyright check.

• All linked resources have been rechecked and have offline fallback instructions.

• Accessibility, child protection, privacy and emergency procedures are documented.

• Pilot instructors can lead the lessons and family tasks safely.

• Revisions and document version numbers are controlled in a shared release log.

09 | Master collection folder map

00_Master_Guide / 01_Instructor_Handbooks / 02_Family_Workbooks / 03_Video_Research / 04_Additional_Resources / 05_Quality_Control

Each module document retains its original content. Original PDFs were gathered without changing technical instructions. The PDF compilations are convenience editions, not an additional expert review.

10 | Release designation

Current release: Draft v1.0 — curriculum assembled; not certified, accredited or ready for unrestricted public deployment. **Next release:** v1.1 — approved introductory videos, revisions after expert review and pilot notes.
